

HOW TO PAINT

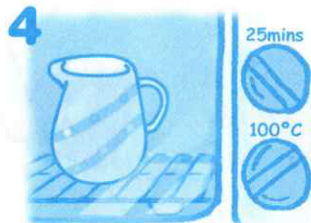

After cleaning the pottery, use the paintbrush to paint on it.

Dry the pottery for 24 hours after you have finished painting.

Put the pottery in normal gas or electrical oven, NOT Microwave.

Bake the pottery at 100°C / 212°F for about 25 minutes.

Remove the pottery out of your oven after cooling off.

Your own unique pottery is ok and bright.

DO'S

1. Wear apron before you start painting.
2. Think before you paint and draw.
3. Use a newspaper to protect table before you start painting.
4. Close the lid of colour paint container after you use it.
5. Wash the paintbrush before you paint the other colour and wash thoroughly after use.

DON'T

1. Don't remove the pottery out of your oven immediately after baking as it is very hot.
2. Don't bake immediately after you have finished painting the pottery as the painting takes time to dry off.
3. Ensure to use normal gas or electrical oven, NOT microwave.
