

Flower & Nature Stand

Place the board onto the stand.
Make sure it sits flat and stable.

Collect Nature Pieces

Gather a mix of: Leaves, Flowers,
Small sticks, Seed pods or gumnuts

Poke & Arrange

Insert stems into the holes on the board
Use different hole sizes for thick or thin stems
Stand sticks upright or angle them for effect

Play Your Way

Change your design anytime
Try patterns, clusters or storytelling scenes
Add new pieces as you find them outdoors

☀ Tips

Larger holes fit thicker sticks
Smaller holes are great for flowers
Fresh plants last longer, but dried pieces work too

KOALADREAM®

Getting Started - Weaving Shapes

Choose your weaving shape (square, circle, triangle).
Find the small holes or notches around the edges and tie one end
of your string or twine to a hole to begin.

Wrap the string across the board from one side to the other.
Use the edge holes or grooves to guide your pattern.
Keep wrapping in different directions to create a web or grid.

☀ There's no right or wrong — patterns can be neat or freestyle.

Add Nature

Collect leaves, flowers, grass or small sticks.
Slide them over and under the string.
Tuck, twist or layer to create your own design.

Create Your Style
Make patterns, shapes or pictures
Mix colours and textures
Fill the board or keep it minimal

Display Your Creation

Hang it up using the top holes
Or place it on a stand (included)
Let it dry naturally for a lasting artwork
